## GLADSTONE CITY COUNCIL PUBLIC HEARING - 09/23/2019

306 S.E. 291 Highway – Suite 5 Lee's Summit, Missouri 64063 www.kansascity-courtreporter.com

1	MAYOR SUTER: Item 17 is a public hearing on site
2	plan revision for property at 6221 North Chestnut Avenue.
3	Open the hearing. Our procedure is are as follows: City
4	staff will first explain the application and any findings or
5	recommendations that come from the staff. The applicant will
6	have the opportunity to present any information to the City
7	Council. And then anyone in the audience who wishes to speak
8	in favor of the applicant will be invited to speak. And then
9	anyone in the audience who wishes to speak in opposition to
10	the application will be invited to speak. And then when we
11	are all said and done, the hearing will be closed.
12	MR. GREER: Good evening, Mayor, members of the City
13	Council. The applicant is requesting site plan approval for
14	the purpose of constructing a convenience store and gas
15	station at 6221 North Chestnut Avenue, formerly known as
16	Tanner's Bar and Restaurant. Their plan is to significantly
17	remodel the building, bring the structure up to code,
18	retrofit the property using a combination of EIFS, stone,
19	artificial stone, and a metal awning for the exterior. This
20	project is a proposed site plan revision and not a re-zoning
21	of the property. The current zoning of this property is CP-3
22	and is zoned for the proposed use. The site plan shows
23	additional trees and landscaping being planted on the eastern
24	side of the property located directly behind the proposed
25	convenience store and gas station creating the required

-	
1	35-foot buffer zone between the subject commercial and
2	residential properties. There is also proposed landscaping
3	on the western side of the property near the planned monument
4	sign and green space between the egress and ingress areas on
5	Chestnut area access points. City staff recommends that the
6	trees and shrubs planted on the property be native to
7	Missouri by nature in an aid to better streetscape. In BMP
8	analysis conducted by Kaw Valley Engineering, run-off drains
9	towards the southwest corner of the property and bio-swale
10	will be implemented to capture and treat run-off from the
11	fueling area prior to run-off exiting the site. The large
12	mechanical equipment for this project is being relocated from
13	the roof of the building to the ground and will be adequately
14	screened from public view with materials similar in design to
15	the rest of the structure. All screening will be reviewed
16	via the building permit process. Included in the City
17	Council packet is a letter from World Fuel Services
18	describing the experience of Amir Nadeem Mehdi, who will be
19	the store operator for the proposed gas station and
20	convenience store. Staff has also included a "retail mystery
21	shop score" for the proposed operator for their various other
22	locations. There are residents in adjacent neighborhoods
23	located to the east of the subject property that are opposed
24	to this particular project. The community development
25	department has received multiple phone calls and a signed

1	letter from the Woodlands HOA Board in opposition to this
2	project in 2018 and 2019. In 2018, Mr. Charles Cuda
3	submitted a letter addressing issues and concerns of both the
4	residents and Planning Commission. On Monday, June 24, 2019,
5	the project team for the proposed gas station and convenience
6	store held a neighborhood meeting with the Woodlands
7	Community. It is city staff's understanding that the
8	Woodlands neighborhood is still in opposition to this
9	project. During the Planning Commission and City Council
10	hearings in 2018 and 2019 there were concerns regarding
11	decreased property values, potential crime, increased
12	traffic, and environmental impacts on the neighborhood. In
13	August 2019 the Planning Commission voted in favor of the
14	site plan revision. The motion carried eight to three; one
15	no; and two abstained. City staff recommends that the
16	following conditions be considered if the City Council
17	chooses to approve this project request. Number 1, any and
18	all disturbed areas shall be sodded. Number 2, all manicured
19	grass and landscape areas shall be irrigated and maintained
20	in perpetuity. Number 3, all mechanical equipment located on
21	the roof and on the ground shall be screened from public
22	view, similar in design to the rest of the structure. All
23	screening will be reviewed via the building permit process.
24	Number 4, a compliant monument sign shall be used to serve
25	the development, the monument sign will need 240 square feet

1	of area landscaping around sign. Number 5 relocation, of the
2	trash dumpster to the northwest corner of the parking lot
3	away from the residential area adjacent to the property.
4	Number 6, all exterior lighting on the site shall be LED and
5	designed to reduce adverse impact on adjoining residential
6	properties. Number 7, outdoor lighting cannot be greater
7	than 0.25 foot candles and 10 feet beyond the property line.
8	Number 8, dumpster shall be enclosed with materials
9	consistent with the primary building. Specific colors shall
10	be submitted and approved as part of the building permit.
11	Number 9, trash service, store deliveries, and gasoline
12	refilling underground commercial gasoline tanks shall occur
13	between the hours of 7:00 a.m. and 10:00 p.m. Number 10,
14	tractor trailers, storage containers and other commercial
15	vehicles including delivery trucks shall not be parked or
16	stored overnight on the premises. Number 11, no more than 50
17	percent of the glazed area of the building shall have
18	signage. Number 12, hours of operation are from 5:00 a.m.
19	through 2:00 a.m. The store will be closed from 2:00 a.m
20	through 5:00 a.m., Monday through Sunday. Number 13, signage
21	compliant with the sign code shall be used. Signage shall be
22	approved at the time of permitting. Number 14, construct and
23	maintain in perpetuity a six foot PVC privacy fence, earth
24	tone in color, along the eastern property line. Number 15,
25	maintain growth between the commercial privacy fence and

1	residential privacy fence in perpetuity. City staff
2	recommends that the request be approved contingent upon the
3	conditions listed above. Thank you and that is all.
4	MAYOR SUTER: Any questions from the council? Does
5	staff wish to address counsel? Does counsel wish to address
6	the Council?
7	MR. BOWERS: Madam Mayor, members of the City
8	Council, my name is Jim Bowers. I am here on behalf of the
9	applicant tonight, Pauch, LLC, and its managing member, Mr.
10	Chuck Cuda. I am a lawyer with the law firm of Rouse Frets
11	White Goss. We have offices at 4510 Belleview, Kansas City,
12	Missouri. With me tonight in addition to Mr. Cuda, who is
13	the applicant, Mr. Jimmy Cascone, who is the owner of the
14	property at 6221 North Chestnut Avenue, Mr. Sajidg Farooqui,
15	who is one of the members of the family who will operate the
16	proposed convenience store, which is currently scheduled to
17	be a Phillips 66 convenience store, and Mr. Bryan Ruoff, who
18	is the project architect. Also with us tonight to answer
19	questions concerning the underground tank and fuel line
20	installation regulations that have been adopted by the
21	Environmental Protection Agency and the Missouri Department
22	of Natural Resources, Mr. Jason Gerber who is with Double
23	Check, Inc., the contractor who will install the underground
24	tanks and lines, should the application be approved. This is
25	a request to approve, as staff told you, an amended site

1 The underlying zoning CP-3 allows a service station plan. 2 and convenience store. The building in guestion has been at this site for approximately 50 years. It has been operated 3 4 during most of that time as a commercial restaurant. The 5 building was built originally in the 1970s for a Red Lobster. During the time it was operated as a Red Lobster, Mr. Cascone 6 7 and his brothers purchased the property and continued to allow Red Lobster to operate it. After Red Lobster closed 8 9 the building, it has been the home to a succession of 10 restaurants; Old Chicago, Tommy's, a local barbecue, and most 11 recently Tanner's Bar and Grill. About 21 months ago, 12 Tanner's closed its doors and the property has remained vacant since that time. Mr. Cascone will tell you more about 13 14 the background and context of this application and his 15 efforts and the efforts of Mr. Cuda to lease or develop this 16 property as a restaurant. They failed in that -- those 17 efforts. They tried to lease or develop the property for 18 other commercial uses that are permitted under your zoning 19 ordinance but were unable to secure a tenant for those other 20 purposes. What they managed to accomplish was to identify an operator who was willing to invest time, money, and energy 21 22 into operating a convenience store with gas at this location. 23 And that's where Mr. Farooqui will tell you about his 24 operations later in the presentation. So in addition to my 25 discussion, there will be a short presentation by Mr.

1	Cascone, Mr. Farooqui, and our architect, Mr. Ruoff. This
2	slide is simply a recitation of what I've just told you
3	about, this being a site plan revision, about the vacant
4	former restaurant building. This is permitted as a matter of
5	right, CP-3 districts, and additionally this slide identifies
6	that to the north of this site, to the south of this site and
7	to the west of this site are commercial uses. And I'll show
8	you a slide in a minute that illustrates. This slide is an
9	aerial photograph with the subject 6221 North Chestnut site
10	outlined in yellow, which is where the proposed convenience
11	store will be located. To the north immediately adjacent is
12	the Wendy's that is in operation. There is a 24 hour
13	laundromat to the north of that. To the south is the United
14	Missouri Bank and other commercial uses along the northeast
15	Antioch Road, which is the road that runs north and south
16	along the west side of this property. To the east side of
17	the property you will see the Woodlands single family
18	subdivision shown on this aerial. This is a time line
19	illustrating what happened a year ago, which resulted in a
20	denial of an application that was, some would say, similar to
21	the application before you tonight. And below that line is
22	the process we've followed since May of this year in
23	submitting the application that is before you tonight, which,
24	in addition to the neighborhood meeting staff mentioned,
25	which we held June 24th, we had a City Planning Commission

1	meeting August 19th at which Planning Commission is
2	recommending approval of this application.
3	What are the significant changes that have been made
4	since last year's application? Number 1, we've significantly
5	enhanced the rear landscape screening between the commercial
6	building and the residences to the east. Specifically 24
7	trees, evergreens, eastern red bud, pear and Juniper will be
8	installed along planting line separating the properties.
9	Also a six-foot fence is proposed to be constructed on our
10	side, which will be in addition to the existing fence that is
11	there erected by the neighbors. We are willing to locate our
12	fence in a way that is most helpful to blocking the view and
13	sounds of our activity from the neighbors to the east. We've
14	agreed to relocate the trash enclosure to the northwest
15	corner away from the residences, which is one of their
16	concerns. The lighting adjacent to the residences meets the
17	zero foot candle standards at the property line, so there
18	will be no light illuminating from light sources on our side
19	to the neighbors to the east. The building height has been
20	reduced. Mechanical equipment was originally proposed to be
21	on the roof, to be screened from the neighbors, but we have
22	since removed the mechanical equipment from the roof,
23	installed it on the ground. It will also be screened on the
24	ground from the neighbors and others. This is the these
25	are the regulations in the zoning ordinance that require that

1	this hearing be held before the City Council as a site plan
2	revision. Because, as I mentioned earlier, the use is
3	permitted as a matter of right in CP-3 districts. This
4	simply walks you through those regulations. A site plan is
5	required in this case simply because the analysis of the
6	staff was that the square footage of the items for sale
7	outside, and that is the gas pumps, will be greater than the
8	square foot items for sale on the inside or in the
9	alternative that the proceeds or the monetary amount from the
10	sales outside is greater than 50 percent of the gross income
11	of the premises. If either one of those conditions apply,
12	then a site plan review hearing like this shall be held.
13	This is a view of the zoning for this property. And, again,
14	our property is the yellow star in the red, cross-hatched
15	area which is planned CP-3 commercial districts. You'll note
16	to the north of us are commercial districts, not planned
17	commercial districts, those are the pure red areas, and to
18	the east, the yellow is the single family subdivision that we
19	abut. Northeast Antioch is a four-lane state highway that
20	has 27,000 cars approximately daily traversing north and
21	south on Northeast Antioch. It connects with four major
22	highways that are within four miles of the site; Missouri
23	210, Interstate 35, US 69, and Missouri 152. The commercial
24	areas on the east side of Antioch have mostly drive-through
25	fast food and/or CVS type uses, UMB Bank is also a

1	drive-through. So you have McDonald's, Wendy's, CVS, Wendy's
2	all drive-through facilities, and of course Wash House with
3	24 hour laundromat approved in 2018 in place of the QuikTrip.
4	Two other cases that I think are germane in considering the
5	application tonight. One is a recent gas station approval
6	adjacent to residential in Gladstone which was a Conoco
7	station at 58th Terrace and North Oak. That site plan was
8	approved a little over two years ago by the same council that
9	is considering the site plan tonight. In that case, the
10	residential set-back of 35 feet was varied or modified to
11	allow the facility to be 16.5 feet from the adjacent
12	residence. And you will see that the new facility in this
13	slide is going up on the right and the existing residence is
14	on the left. And in this case the residences share not only
15	the same street but residential uses are on three sides of
16	that facility. That facility was demolished and rebuilt at
17	3700 square feet, much closer to the homes than it was
18	beforehand. And it increased the number of fueling stations
19	that were allowed. In that case, there are no restrictions
20	on the hours of operation. The other case and this is a
21	slide showing the before and after effect on the adjacent
22	residential neighbor. This is the second case, the QuikTrip
23	at 72nd Street and Prospect Avenue. This site plan was
24	approved in November of 2015. Councilman Yarber was not on
25	the council at that time. Councilman Hill had his seat but

1 it was approved, allowing residential uses on two sides of Again, residences shared the same street or 2 the store. entrance to the facility. A -- the older facility was 3 4 demolished and a new 5800-square foot store was built in 5 closer to the homes removing the existing tree screening that had protected the existing homes. They doubled the number of 6 7 fueling stations and there are no hours of restriction of 8 operation on that facility. The top two slides show you what 9 it looked like before the site plan approval, and the two 10 below show what it looks like today, February of 2019. This 11 is the current view of our facility at Antioch and North 12 Chestnut, 6221 North Chestnut. And I would like to ask Mr. 13 Cascone to come up and talk to you and give you some context 14 about his family's ownership of this property and their 15 participation in Gladstone and what efforts he has made to 16 find another restaurant-type tenant. Mr. Cascone.

17 MR. CASCONE: Good evening, Mayor. My name is Jimmy 18 Cascone. I am the youngest of five brothers that grew up in 19 the Northland. We spent our whole life in the Northland. 20 And a sister who is younger than the boys. We've lived in 21 Gladstone, we, my wife and I and my family, live in 22 Gladstone. My brother Frank, his wife and family, he raised 23 his children in Gladstone. My brother Larry, before he 24 passed away, lived in Gladstone, raised his family in 25 Gladstone. As well as my nephew Victor who recently located

306 S.E. 291 Highway – Suite 5 Lee's Summit, Missouri 64063 www.kansascity-courtreporter.com

1	to Gladstone, also. So our roots are obviously north. We've
2	spent, you know, 65 years on North Oak Trafficway. In 1970
3	we had an opportunity to purchase a property on Antioch Road
4	deserted by Red Lobster to relocate to a more prolific area
5	up on Barry Road. They operated there for quite some time.
6	After they vacated the premises, we planned to go in there
7	and put an operation but were approached by a national
8	company called Old Chicago to take the space. They felt that
9	it met their demographics at the time going there. And they
10	did take it. And they had stayed there for about five years
11	and leased the property. At which point in time they
12	revamped their original decision and decided to leave the
13	property. We left the property vacant for a while trying to
14	figure out what we were going to do. At that time we had
15	nieces and nephews who were involved in restaurant business.
16	We thought it was an opportunity for us to do something a
17	little more casual than Cascone's on North Oak, and we turned
18	around and put a concept called Tommy's in there and it
19	operated for about 12, 13 years, until we lost two brothers
20	during that period of time and family got scarce. We decided
21	that it was in our best interest to focus on, for lack of a
22	better term, the Cascone name, which had the large restaurant
23	on North Oak and it also has a restaurant in Overland Park,
24	Kansas. We turned around and were approached by block and
25	company at that time, block turned around and found a what

1	they consider to be a suitable tenant, it was a barbecue,
2	Suzie Q's and they came in and didn't last long. Block was
3	more interested in getting the space leased. They did not
4	have the financial wherewithal to sustain the neighborhood.
5	Part of the issue with the neighborhood at that time dealing
6	with the restaurant and dealing with it today is the fact
7	that daytime business hardly exists for a full service
8	restaurant. Nonetheless, they turned around and they left,
9	the smoker was problematic in a neighborhood. And the
10	neighborhood, we have a vested interest in the Northland. We
11	are not going to let just something happen. We were
12	approached by a mutual business partner that Tanner's Bar and
13	Grill was looking to relocate from the Meadowbrook Shopping
14	Center directly across the street. And they came over. And
15	they operated for about five to six years. The space was
16	larger than what the proprietor had envisioned being able to
17	operate. And therefore, after lease negotiations and she
18	turned around and complied with them, decided to abandon the
19	property on a cold winter night and move back to Meadowbrook
20	Shopping Center. So the property has been vacant almost two
21	years today. UMB site next door, you know, I realize that
22	there are concerns about a gas station, et cetera, and I know
23	there is history of council members that aren't around
24	anymore, but that was a Zarda gas station which was adjacent
25	property to the location we are talking about. We spent

1	numerous efforts to release the property. They began
2	immediately. Initially worked with Block, but our fear with
3	Block was the fact that they would put just anyone in that
4	space and we didn't feel like that was the way for us to go a
5	second time. We hired Chuck Cuda and his company, local
6	developer, he had an office in the neighborhood, I knew
7	Chuck, I knew Chuck's reputation, and we decided to go that
8	route and give him the contract on the building. He showed
9	it to many restaurants. And believe me, we've thrown
10	restaurants at him right and left. We've contacted
11	restaurant owners both nationally and locally. It's not a
12	prime location for a national restaurant. We targeted more
13	local operators. We have spoke with gates, with Q-39, with a
14	number of barbecue restaurants. I think we had a couple of
15	Chinese restaurants in there, too. It just, at the end of
16	the day, the location just didn't match up. So we authorized
17	Chuck to search more broadly outside of the restaurant
18	business. Gladstone Urgent Care moved into the old Mosaic
19	building, Family Dollar, Dollar General, real estate offices.
20	We approached several full service car washes, dental
21	offices, even an Andy's Frozen Custard, you know, to go into
22	the space. We had approached Wendy's prior to Wendy's opting
23	to take the Lawson Bank, the vacated Lawson Bank space, which
24	we don't understand to this day. Besides the location we are
25	here about, there is another restaurant space that exists on

1	that corridor, and that is what it is, it is a corridor that
2	doesn't see much viable full service restaurant traffic. And
3	it's two blocks north of Chestnut property is located in what
4	used to be the North Prospect Shopping Center. May still be
5	called that. It had a sit-down restaurant in it. It housed
6	Stone Canyon Pizza, which ironically has now years later,
7	years and years later relocated to the North Oak corridor.
8	It also housed a Star Point Cafe, an Arcobasso's Restaurant
9	and another one I don't believe I know the name of at this
10	time. But it has now been empty and on the market and vacant
11	for close to 900 days. A full service restaurant as a
12	full service restaurant operator, I've come to realize that
13	the sit-down restaurant market in that area of Gladstone just
14	doesn't exist like it did 50 years ago. And as a business
15	owner, I try to keep track of how the market is and how the
16	market works for the neighborhood. And I'm not trying to
17	hoodwink Gladstone by changing what the property was
18	originally to what we propose or are asking for
19	consideration. All we are is a land owner and business
20	people that are coming to you. And the first thing that we
21	did do prior to any of this was made sure that the property
22	was zoned properly for the use which it's being proposed.
23	The bad part of it is, is that we have ongoing expenses, it
24	doesn't stop. The building is empty, that doesn't mean it
25	goes in limbo, you know. We have to maintain the building.

1	We repair damage from vagrants. People broke in last year
2	through a metal door and slept in the boiler room through
3	Christmas. They broke pipes, they stole copper. Everything
4	that vandals will do. There has been illegal dumping there
5	because it's dark, it's off the beaten path. But we still
6	pay utilities. We still pay insurance. And we still
7	maintain the property to the best of our condition. And now
8	we've seen graffiti being, you know, tattooed onto the
9	building also. So that is my case. I my family again
10	are, we are Northlanders life-long, I don't know if everyone
11	can say that, you know. But we are Northlanders life-long
12	and we take pride in the Northland. We take pride in
13	Gladstone.

14 MR. BOWERS: Mr. Cascone mentioned Mr. Cuda as the 15 developer of this site. And Mr. Cuda is an experienced 16 developer. He has developed the Country Club shops, Foxwood 17 Shops, Quality Plaza. His typical neighborhood retail 18 tenants are an animal hospital, pet grooming, pet supplies, 19 cupcake stores, ice cream, sandwiches, nutrition, realtors, 20 insurance agents and the like. Interestingly enough, I was 21 advised yesterday totally unrelated to this case that Mr. 22 Cuda has been named by the Northland Neighborhood Association 23 as good neighbor business of the year and will receive an 24 award to that effect October 18th at the annual breakfast at 25 Northland Neighborhood, Inc. So kudos to Mr. Cuda on that.

I would like to ask Mr. Ruoff who is the project architect to
 walk through with you the site plan and the revisions that we
 are making to the site to make this a first class convenience
 store with gas. Bryan?

5 MR. RUOFF: Hello, I'm Bryan Ruoff, 3F30 Architects. My job is to be mostly walk you mostly through the visual 6 7 parts of this. What you are looking at here is the view from 8 the neighborhood up the hill to the property. And if you see 9 the arrow right there, that is the top of the current 10 building. And with the latest proposals and drawings and 11 renderings we are not proposing to raise that at all. We'll 12 take the (inaudible) off the building and re-face the entire 13 building, which you'll see in a second with new materials. 14 But we are lowering -- taking all mechanical equipment off 15 the roof so there is no necessity to raise the building. So 16 that is a benefit in two ways. One is it lowers the visual 17 aspect of the physical building down so it's not as visible. 18 And, two, it cleans up the whole scenery of the roof line. 19 And I think this is all obvious, but if you need me to point with a pointer the front of the building in the blue, which 20 21 will be to the left of the screen is the part of the building 22 we are proposing to remove. So if you've been in the 23 building, that is an existing bar area. We are going back to 24 an existing steel beam line and removing the front part of 25 that building. That gives us space to do what we want to do

1	in the front of the building. It also allows us to put a
2	whole brand new wall across the front. So that is why the
3	elevation of the front does not resemble what is there now.
4	If you look to the back, there is a porch back there, it
5	showed in an earlier picture that she had. The roof porch
6	will be removed. It is not an aesthetically pleasing aspect
7	and there is no need for it. So that will be removed. And
8	that allows us to put 35 feet of landscaping basically across
9	the entire east side of the property. You might also look in
10	this picture and see currently the trash enclosure is back
11	where it says 35 foot buffer right in that area, we are
12	proposing to move the trash enclosure all the way to the
13	front of the property where Wendy's is. So the trash
14	enclosure that is there now will not be close to the
15	residents. It will be at the back of Wendy's right down the
16	corner. And this is a black and white version of the
17	elevations showing that the elevations of the building that
18	are there now will not be in existence anymore. We are going
19	to re-skin the entire building, take off the (inaudible) we
20	are going to re-skin it with an EIFS stucco look. There will
21	be a natural looking stone across the front. And I have a
22	color one coming up. And a metal awning on the front. And
23	we are not sure it is going to be branded Phillips yet, but
24	it will probably be Shell Phillips. So I've got Phillips up,
25	but that is just temporary. This is a back view of the back

1	end where we are proposing. What you'll see is along the
2	bottom is the 35 foot set-back, we are proposing a fence
3	line, a new fence line through the middle of that. It has to
4	be strategically placed to allow for full growth landscaping
5	so the trees that you are seeing, the evergreen trees you are
6	seeing through there, if you look in the lower left picture,
7	those trees get to be up to 40 feet tall, 30 feet diameter.
8	And they are pretty fast growing so that will fill in fairly
9	quickly. The trees to the south side or, well, on this, the
10	lower side of that fence, which would be to the west, those
11	trees are the eastern redbuds. And you are seeing it in this
12	picture in an up-coming picture you are seeing it in a
13	spring bloom pink. But it would be green like a normal
14	redbud most of the year. We are also, where we had the
15	mechanical system on the ground, we are mixing in sky rocket
16	Junipers which are evergreens, smaller, taller, more compact
17	tree lines you see that along our lower mechanical fence
18	there. So Jim thinks this looks like cotton candy. But
19	those are eastern redbuds. We did differentiate the trees.
20	So the trees to the right are those large evergreen trees
21	that would be there full actually those aren't full growth
22	but they'll fill out and need a lot of trimming. There is a
23	fence line in the middle and you have the deciduous trees
24	that will be to the west side of that. And then I might add
25	the 250 foot of landscaping required at the sign as shown in

1	the lower, down at the very bottom around the sign, that is
2	all landscaped around the proposed monument sign. The area
3	to the west is going to be a small retention area that will
4	handle filtering of water coming through. This is a front
5	elevation of what I just described. I might point out I,
6	don't know if you can see it, but if you look carefully there
7	is an outline of the roof of the house roof lines behind
8	those eastern redbuds. It is seen in that background. So
9	when you get down to eve height, it is four or five feet
10	above the proposed new PVC fence. And then this is a
11	cross-section that we've shown in various capacities, and
12	this is, I updated it, so it was a little more readable and
13	more pertinent to a screen presentation. The red line across
14	the top is a section through the site and then on the at
15	the section at the bottom is corresponding, so each one of
16	those red lines corresponds with a discussion point in the
17	section, so we some of this is done with surveys. Some of
18	this is done Google Earth. This is a compilation of
19	information. But you can see the house to the east and you
20	can see the property line and the fence. And then you can
21	see the proposed fence and then you can see the end of the
22	existing building. Then you get to 156, that is the proposed
23	manhole location for the tanks. 199 is the dispenser, and
24	209 is where we are proposing to put the vents. We are going
25	to run the vents up through the front of the canopy.

1	MR. BOWERS: Bryan, that distance is from what to
2	what?
3	MR. RUOFF: Zero is at the house and then you add
4	those dimensions, add themselves up, they work their way up
5	to the east side of the property so the property line on the
6	east side is about
7	MR. BOWERS: Location of the tanks are 156 feet away
8	from the nearest residential home edge.
9	MR. RUOFF: Well, that is mostly true. It is based
10	on that section. So because the property curves, those
11	dimensions change by three or four feet depending where I
12	take the section out. Not to be misleading, but I had to cut
13	the site somewhere. So this was a visual depiction of some
14	of the conversations that have occurred in the past. That is
15	the end of mine.
16	MR. BOWERS: Thank you, Bryan.
17	MR. RUOFF: You are welcome.
18	MR. BOWERS: As I mentioned earlier, we are going to
19	have the operator, proposed operator of the convenience store
20	tell you about his family, their operations in Kansas City
21	and Gladstone, as well as what they propose to do with this
22	location. Mr. Farooqui.
23	MR. FAROOQUI: Sajig Farooqui. Good evening,
24	Council and mayor. Our family has been in business,
25	convenience store business for the last 20 years. And we

1	have moved from Houston to Kansas city area in 2005, and
2	purchased our first convenience store at 75th and Troost
3	Avenue in Kansas City, Missouri. It was an old kiosk-style
4	Phillips 66 where the small building in the middle and pumps
5	on the each side and there is an automatic car wash behind
6	it. Recently, we have changed that and took the car wash out
7	and made a 3500-square feet building, convenience store
8	building and added a few more pumps to it, and it has
9	become people who have been there and looked at it, they
10	call it a mini QuikTrip. And as an operator, I am very much
11	impressed with QuikTrip model of business. They are doing
12	very well and they are very successful. So just being in the
13	area for almost 20 years, being in the business for almost 20
14	years, we are five brothers and total of four stations that
15	we own and operate. And one of the family members is always
16	at the store managing it. And recently we have received a
17	certificate of appreciation from Blue Hills Neighborhood
18	Association for doing a very good job in maintaining that gas
19	station on Prospect. 55th and Prospect. At this location,
20	we are considering to turn this old Tanner's building into a
21	gas station. As you can see on the drawings that it's going
22	to be almost 4800 square feet of building and it's going to
23	take a lot of work to turn that from Tanner's into a new
24	Phillips 66 gas station. We are going to have three cash
25	registers, small seating area for customers who want to have

1	lunch or what have you, separate men's and women's bathroom
2	for the customer's convenience, soda fountain bar, coffee,
3	and roller grill and pastry, similar model to QuikTrip as
4	well. If given the chance, it will be a great asset to this
5	area and the neighborhood. That is all I have to say. And I
6	hope you guys will consider giving us the opportunity.
7	MR. BOWERS: How about the operational plan?
8	MR. FAROOQUI: Operational plan is we are very
9	strong in security. We have security cameras, they are HD's,
10	state-of-the art security cameras. And in some 32 to 36
11	cameras, that is we have talked to our audio and visual
12	guy, and that store clerk visibility of all activities
13	because we are going to be the standing six inches higher
14	than the floor and those security cameras are 24/7 real time,
15	you can monitor it anywhere from your cell phone to through
16	remote access. Thank you very much.
17	MAYOR SUTER: Can you tell us all the locations you
18	currently have?
19	MR. FAROOQUI: 75th and Troost in Kansas City
20	Missouri. 55th and Prospect. 45th and Prospect. 72nd and
21	Highway 71 North. Hopefully this one, too.
22	MAYOR SUTER: Thank you.
23	MR. FAROOQUI: Thank you very much.
24	MR. BOWERS: Staff mentioned at the outset they were
25	recommending you adopt 15 conditions, if you choose to

1	recommend approval of the site plan. I would be remiss if I
2	didn't tell you we've reviewed all 15 of those conditions and
3	accept them. We've also talked to many of the businesses and
4	neighbors along Antioch and this site. This drawing
5	identifies who those neighbors are who have signed letters in
6	support of the project, and I have copies of those for each
7	of you as well as staff of those letters which reflect
8	support for the project as shown on the map. In addition,
9	there are a number of people here tonight in support of the
10	application and I would ask that they stand. Everyone here
11	in support of the application, please stand. Thank you. In
12	previous hearings there were four issues that I think the
13	neighbors brought up as their concerns. And those issues
14	were security, lighting, noise and property values. And the
15	conditions of approval address each of those. Security, the
16	staff is recommending limitation on hours of operation and a
17	second fence, both of which we are accepting. They
18	recommended we reduce the lighting on site so as to provide
19	zero foot candles at the property boundary line. We have
20	done that. Noise was a concern. We are limiting hours of
21	operation to address the noise concern. Movement of the
22	dumpsters was identified as a concern of the neighbors. We
23	have relocated the dumpsters and they are at a site that is
24	remote from where the neighbors are. There was concern about
25	deliveries, and we've reduced the hours for deliveries and

1	trash service pick-up. Finally, property values were raised
2	as a concern. The addition of a six foot privacy fence, the
3	landscape screening, and this is an important point, putting
4	a vacant building back in service, and I'm going to deal with
5	that in a little more detail. Security. We believe that the
6	neighbors' concern about security is misplaced. As Mr.
7	Cascone mentioned, a vacant building is a target of
8	vandalism. What all of the studies that we've reviewed seem
9	to confirm is that the worst thing for adjacent property
10	values is a vacant building. This building has been vacant
11	for, as Mr. Cascone said, almost two years now. The studies
12	suggest that a vacant building and crime rates are related.
13	The longer the periods of vacancy, the greater effect on
14	crime rates. Vacant building renovations are significantly
15	associated with city-wide reduction in crime. Again, these
16	are based on studies that have been produced by the United
17	States Department of Housing and Urban Development. One
18	study was in 2014. The other study was in 2015. But both
19	came to the same conclusion with respect to the impact vacant
20	buildings have on adjacent properties. And, finally, eyes on
21	the street and our security cameras will provide additional
22	security for the neighbors. The neighbors raised a concern
23	about health and the environment, the potential water
24	pollution problem that they perceive from the sale of
25	gasoline. We have hired civil engineers to study the storm

1	water run-off and produced plans to mitigate any potential
2	pollutants from this site entering the storm water by the
3	development of bio-swales that will collect the water from
4	the site and filter it before it enters the general storm
5	water system. Did I mention, one of the Double Check
6	employees is here tonight to answer any questions you have
7	about the gas station technology that is currently employed
8	based on the Environmental Protection Agency and the Missouri
9	regulations with respect to underground storage tanks and
10	fuel lines. At the last hearing, the neighbors cited to you
11	and the Planning Commission a California-area resources
12	board, so-called board recommendation, and they cited one of
13	the recommendations of that study that was not appropriate or
14	related to the site that is before you. The information they
15	had related to a super site, and this is not a super site.
16	This is a traditional or normal gasoline service station and
17	the California Resources Board recommendation for a site of
18	our type is that the dispensing facility be at least 50 feet
19	from the adjacent residence. Our, case we are three times
20	that. So we are more than following the recommendations made
21	in the California Resources Board study of gasoline service
22	stations. And, again, just to summarize what Mr. Ruoff told
23	you, the pumps are 190 feet from the residences. The vents,
24	the so-called vents that vent these tanks, are 200 feet, and
25	the tanks themselves are 150 feet. Property values, as I

1 mentioned, property values may be negatively impacted by a 2 vacant building. Development of this property will more likely increase the value of the property rather than have a 3 4 negative impact on the value. There is a study on the impact 5 of abandoned buildings to adjacent residences done in 2001 in the city of Philadelphia, Pennsylvania -- and I realize we 6 7 are not Philadelphia, but it was the only study I could find that had an analysis of what a vacant building does to the 8 9 values of adjacent residential property. This study determined houses within 150 feet of a vacant building are 10 11 reduced in value by about \$7500. And as you get further 12 away, 450 feet, a football field and a half, it still has an 13 impact of up to \$3500 per house. Not to say that is apples 14 to apples in this case, but it is an example of the type of 15 analysis that is done about vacant buildings or abandoned 16 buildings and their impact on adjacent property. Storm 17 water, I mentioned this development will actually decrease 18 the amount of impervious surface. What I mean by that is 19 there is surface area for the restaurant that is asphalted 20 that will be removed and be returned to dirt, and that is 21 along the east side behind our building, and will be planted. 22 That is the 35-foot planning area that will separate our 23 property from the residences. So the overall run-off is 24 decreased because we are decreasing the impervious surface. 25 The studies, and these are based upon a storm water drainage

1	letter we had prepared by our professional engineer last
2	year, we had it done again this year, and we've provided
3	staff with copies of those letters no on site detention is
4	required. The run-off from this site, the site drains from
5	the east to the west. So the back of our property is higher
6	than the front of our property. And so the drainage of our
7	site runs towards chestnut. It does not run towards the
8	neighbors to the east. Bio-swales will be implemented on the
9	west side of the property to capture and treat run-off from
10	the fueling area via infiltration and plant absorption. So
11	we think we are addressing the storm water run-off areas that
12	have been raised. All of our team are here to answer any
13	questions you have. I appreciate your time and attention to
14	detail. We would ask that you respectfully recommend or
15	approve the site plan that we've submitted to you. Thank you
16	very much.
17	MAYOR SUTER: Any questions?
18	COUNCILMAN YARBER: Yes. You met with the nearby
19	homeowners.
20	MR. BOWERS: Yes, sir.
21	COUNCILMAN YARBER: About a month ago. If I recall
22	correctly they remained largely opposed to this?
23	MR. BOWERS: That's correct.
24	COUNCILMAN YARBER: Why do you think they remain
25	opposed to it?

1	MR. BOWERS: I think there are a number of factors
2	in play. I have been doing land use work for the last 40
3	years. What I know is a consistent factor is that neighbors
4	hate change. Any change. They fear change. The fear of the
5	unknown always causes concern in a case like this. Until the
6	store is up and operating and proves itself to be compatible
7	with the neighborhood and not a problem, I doubt that that
8	underlying fear is likely to change. But I see in case after
9	case after case which neighborhood fears are dispelled once
10	the development goes in and operates. That seems to be a
11	pattern. I think there is also some disbelief in the opinion
12	of our experts. For example, one of the property owners
13	immediately to the east of us is convinced that storm water
14	run-off is leaving our property and entering their property
15	to their detriment. That is why we had the second study done
16	by our civil engineer, to confirm that that was not the case.
17	Water does not run uphill. And I can't explain what to me is
18	unexplainable. I recognize their concern and I don't
19	discount it, but I can find no evidence to support their
20	concern about storm water run-off from our site. There are I
21	believe fears about sale of gasoline that are not based on
22	fact or not based on any of the studies and information that
23	we've discovered or reviewed. I remind you that there are
24	27,000 cars daily that go up and down Northeast Antioch ROAD.
25	That is who we will be serving, will be the motoring public

## GLADSTONE CITY COUNCIL PUBLIC HEARING - 09/23/2019 31

1	that is nearby. New trips will not be attracted to this
2	convenience and grocery store. It will we will serve the
3	existing traffic. So I wish I could give you a better answer
4	to your question, but I, certain things I can't explain.
5	COUNCILMAN YARBER: Thank you.
6	PRO TEM MAYOR MOORE: Mr. Bowers, do you have any
7	idea about the estimated volume of gallons of gas?
8	MR. BOWERS: We do. We have an estimate of I've
9	actually since forgotten that, I gave it to the Planning
10	Commission, and
11	AUDIENCE MEMBER: I think it is 130,000 gallons per
12	month.
13	MAYOR PRO TEM MOORE: 130,000 gallons per month.
14	MAYOR SUTER: Okay, thank you. Is that all from the
15	applicant? Is there anyone from the audience who would like
16	to speak in favor of this application? You need to come to
17	the podium. In favor. Anyone want to speak in favor, I ask
18	you to come to the podium give your name and address for the
19	record. Thank you.
20	MR. COSTELLO: My name is Paul Costello Junior. I
21	own the property at 2900 Kendallwood and the property at 6420
22	North Prospect. One of the things I would just like for the
23	council to keep in mind is that there is not going to be a
24	new element introduced, to most of the people that are going
25	to come up and speak in opposition. Meaning that the

306 S.E. 291 Highway – Suite 5 Lee's Summit, Missouri 64063 www.kansascity-courtreporter.com

1	QuikTrip was there when they purchased their houses. And
2	that QuikTrip to the center of the neighborhood from the
3	pumps to the center of the neighborhood from our pumps is
4	less than 300 feet. So I just want to bring that to the
5	attention, that someone who has lived in that neighborhood
6	for over two years bought a property so I just want to
7	bring that to your attention. There are people that have
8	moved into that neighborhood since then, and maybe that is a
9	new element to them. But for the majority, the introduction
10	of fueling stations is not something that is new to that
11	environment and it should be something that you should take
12	into consideration, being the fact that it is a property that
13	is zoned for that. And that is all I want to say. Thank
14	you.
15	MAYOR SUTER: Is there anyone else who would like to
16	speak in favor? If you would like to speak in favor, please
17	take the podium.
18	MR. ARELLO: My name is Nick Arello. I am a
19	resident of the Woodlands. My neighbors might not like me
20	after this. I have been there 18 years. I also had a
21	business on Antioch Road for 18 years and that was 2121
22	restaurant. And I remember way back when I opened the
23	restaurant before Bob's IGA came along it was vacant for
24	years. And when they finally opened that store, my business
25	increased 35 percent. My point is, you've got progress being

1	done up and down Antioch Road from the Conoco to the Wendy's,
2	to the laundromat, all along there. Progress is being made.
3	You can't stop progress. This is a good thing. I don't want
4	my neighborhood to be in a next to a blighted building.
5	And the restrictions that this council imposed on this
6	project, I believe there was 15 items, with the buffer of
7	trees and the run-off of water, I don't know what the big
8	opposition is. I don't like the vacant building. Sorry.
9	MAYOR SUTER: Is there anyone else who would like to
10	speak in favor? Sir, if you would please take the podium.
11	MR. VITALE: My name is Tony Vitale. I own a couple
12	pieces of property right around the corner and I'm really
13	just wanting to say that I'm glad they found someone
14	dedicated to spend so much money like they are doing here and
15	bring it up to modern look, because the blighted building
16	that is there just really isn't good. That is all I wanted
17	to say.
18	MAYOR SUTER: Anyone else who would like to speak in
19	favor of the application? Anyone who would like to speak in
20	opposition? Please take the podium. You can make a line.
21	If you want to line up, that's great. Then we won't be
22	fighting over who is next. Thank you. Name and address,
23	please, for the record.
24	MR. CHERY: My name is Jack Chert. I live at 125
25	the Woodlands. C-h-e-r-y. Members of Council, Madam Mayor,

country my older sister who passed away told me one thing and that is America is a great country, you can speak your mind and all leaders will listen. And tonight I believe I'm in a great position and I'm in front of five great people who will listen to my little voice who barely speak English. If I may ask this gentleman to put up the very first picture. That would be my house and my neighbor. I believe the very first picture. That is my house. There we go. Tonight I would like to ask, how would you feel, Members of Council, if your grandkids your child is playing in your back yard a few feet away from a gas station? I'm from a country where life does not respect and right now if you watch CNN or the news, you see what is going on back in my country. The reason why I'm here tonight, just because I feel free, people will listen and they will take my life and my kids' life very seriously. Mr. Cascone, I understand your pain as a business owner, as a vacant property. The owner of 66, I understand, you try to do business, give people job, also provide tax for the City of Gladstone. November 2003 when I come to Missouri, I picked Gladstone. Why? I loved the name, I love the city, and it was clean and very beautiful city. I don't remember, few years ago when Gladstone was the Number 1 City because we all get together. I'm not asking for favor. But Members of Council tonight, I'm asking you to do me one quick	1	I'm from Haiti. Almost 20 years ago when I come to this
and all leaders will listen. And tonight I believe I'm in a great position and I'm in front of five great people who will listen to my little voice who barely speak English. Mr. Cascone, I understand your pain as a business owner, as a vacant property. The owner of 66, I understand, you try to do business, give people job, also provide tax for the City of Gladstone. November 2003 when I come to Missouri, I picked Gladstone. Why? I loved the name, I love the city, and it was clean and very beautiful city. I don't remember, few years ago when Gladstone was the Number 1 City because we all get together. I'm not asking for favor. But	6	listen to my little voice who barely speak English. If I may
9 picture. That is my house. There we go. Tonight I would 10 like to ask, how would you feel, Members of Council, if your 11 grandkids your child is playing in your back yard a few 12 feet away from a gas station? I'm from a country where life 13 does not respect and right now if you watch CNN or the 14 news, you see what is going on back in my country. The 15 reason why I'm here tonight, just because I feel free, people will listen and they will take my life and my kids' life very 17 seriously. Mr. Cascone, I understand your pain as a business 18 owner, as a vacant property. The owner of 66, I understand, 19 you try to do business, give people job, also provide tax for 20 the City of Gladstone. November 2003 when I come to 21 Missouri, I picked Gladstone. Why? I loved the name, I love 22 the city, and it was clean and very beautiful city. I don't 23 remember, few years ago when Gladstone was the Number 1 City 24 because we all get together. I'm not asking for favor. But	7	ask this gentleman to put up the very first picture. That

	23	remember, few years ago when Gladstone was the Number 1 City
25 Members of Council tonight, I'm asking you to do me one quick	24	because we all get together. I'm not asking for favor. But
	25	Members of Council tonight, I'm asking you to do me one quick

1	favor, think twice. Later on if anything ever happened to my
2	kids, my grandkids, your grandkids play all the time,
3	something ever happened, go ask yourself how you going to
4	live to it while you are the decision maker and you did not
5	make the right decision, please. My English is very little.
6	I barely speak English. But I speak French very well.
7	Please, think twice. I know you are the decision maker. But
8	think about my kids, live here in a great country, land of
9	opportunity. That is why I'm here. I grew up in a very poor
10	family, mom and dad and six kids in one bedroom home, and
11	tonight I live in the Woodlands because of great country
12	called America. I believe in you. I know you will listen,
13	please. I am not against the business owner. I am not
14	against Mr. Cascone. But, please, life matters. Tonight I
15	am not talking about property values. But think about my
16	kids will play in the back yard, 130[sic] gallons of gasoline
17	fuel selling days and night, and, as you know right now,
18	there is so many crazy people out there. We don't know.
19	Please, once again, once again, tonight before you go to bed,
20	think twice about this little guy who barely speak English
21	come before you to ask you make the right decision. Even I
22	don't come to you, will say thank you, but you will go to bed
23	with your heart and if anything ever happen you will say, I
24	make the right decision. Don't think about the business, the
25	tax the City of Gladstone will bring because we people in the

1	Woodlands, we pay taxes as well. But think about my kids'
2	life, about my life, about her grandkids' life, please, I'm
3	here to beg, please, think twice. Thank you so very much.
4	MS. CLYNE: My name is Mary Clyne, C-l-y-n-e. I do
5	not live in the Woodlands, but I am a resident, a property
6	owner just north, two
7	MAYOR SUTER: Sorry, for public record.
8	MS. CLYNE: 2704 Northeast 63rd Street. I was here
9	a few years ago, I was in a meeting with the Planning
10	Commission and with the City Council when Mr. Wagy, the
11	McDonald's wanted to re-zone and rebuild. And you may want
12	to take him off your neighborhood supporters, and I'm going
13	to make this real short, he showed pictures just like that
14	with the cypress growing beautiful, the retaining wall was
15	supposed to be eight feet from my property. It's four. He
16	was going to maintain it, mow it. And can I show you what it
17	looks like today? And it has looked like this for 16 years
18	since I've lived there. The only time he maintained it is
19	when he was seeking approval. I have a six-foot fence at the
20	back of my property, these weeds are higher than the six-foot
21	fence. It's been that way except for when they built it,
22	when they built the retaining. Wall, after they built it,
23	they left it, there was gravel all over the place. They
24	never cleaned it up. There was an orange net fence between
25	the QuikTrip and the McDonald's. It was there for well,

1	it was just taken down it blew down a year ago, they've
2	never mowed. I have to come into the City all the time
3	asking them to clean it and, you know, get out there. They
4	went out last week and told them that they had to mow. Which
5	they didn't. That is my concern. All of the promises, same
6	thing these people have told everybody here, were not kept.
7	The building was they were supposed to put the cypress
8	there was supposed to be three feet from the privacy fence to
9	the retaining wall where they were going to build. They
10	built the property all extended it all the way to the end
11	of the retaining wall, and it's only about four feet from my
12	fence. That is my concern. They do not maintain. I don't
13	mind if there is a business put in there, but it looks great
14	in the front, but every person that lives behind it needs to
15	be given the same consideration and they need to maintain it.
16	So if you want to see the pictures, so you can maybe take him
17	off your neighborhood support list. Because it's horrible.
18	The weeds are about, some of them are 10 feet high. And it's
19	always like that, 16 years I've lived there. So I don't want
20	the people in the Woodlands or myself, the trash blows
21	everywhere all over the neighborhood, in the trees, Styrofoam
22	everywhere. That is my concern.
23	MAYOR SUTER: Thank you, ma'am. We do have property
24	owners who only respond when they get cited. That is a

25 problem.

1	MR. MALIK: Good evening, everyone. My name is Ali,
2	that is my first name, spelled A-l-i. Last name is Malik,
3	M-a-l-i-k. So if you look at that picture over there there
4	are two houses, the house that is immediately behind that
5	structure on that gas station which is being proposed is the
6	property where I live in. So just a brief background about
7	myself and then I will make my most important argument. So I
8	am a physician and I trained at University of Nevada Las
9	Vegas. I am a cardiologist in training and my wife is a
10	pediatrician. She works at Children's Mercy Hospital. I
11	work at the Mid-America Heart Institute. So not only am I a
12	physician, I am a physician scientist. I am actually in a
13	six or seven-year track to train to understand the risk
14	factors that make our cardiovascular disease the burden it is
15	today. That is the only argument I am going to make. The
16	rest of my neighbors have spoken very eloquently, but my
17	argument is simply one: That is health. We have two little
18	children, one of them is four years old and we have a
19	two-year-old son as well. So I don't know if many of the
20	people in this room realize this or not, but air pollution or
21	quality of air is perhaps the risk factor for cardiovascular
22	disease that has never been talked about. I am still
23	developing my research niche, but my niche is probably going
24	to be the impact of quality of air on incidents and burden of
25	cardiovascular decease. If you read again these are

1	scientific terms I might use, but the biggest scientific
2	journal in circulation I myself read this year published a
3	paper cited multiple times looking at impact of air pollution
4	which is particle matter that stems directly from how many
5	thousands of gallons of gasoline is going to be there every
6	month. And imagine you living right next to it. So I would
7	say my children play in the fence line right behind that and
8	that will be hardly 20 or 30 feet away from all of that
9	source of pollution. So this long-term exposure to this
10	pollution causes arteriosclerosis, leads to blocks,
11	deposition on the arteries causing heart failure, heart
12	attacks, strokes and whatnot. And this is not a one-time
13	exposure. I am personally speaking for my children and my
14	neighbors' children and my neighbors themselves most of
15	and the people who are particularly at risk are people who
16	have other conditions like diabetes and older people. And
17	most of our neighbors, I don't mean to sound to be offensive,
18	are slightly older. So, I mean, we my wife and I are
19	probably the youngest in that whole area. But, again, this
20	is my only argument, I am not here to make any enemies. I am
21	only here to make friends. So this, if this gets approved,
22	this ourselves, like my family, my kids will be playing
23	there for the rest of their childhood and going into like for
24	years and years, for like 10 years, 15 years until they
25	finally go off or we move somewhere. We are not moving over

2than a year ago and we are here for like as I said, my3training is six years. I am only the second year of my4training. So I just plead to consider the impact of this5proposal on the residents. And I feel like we are the one6family that is going to be affected the most because that is7our house right over there, the first house you see behind8that is our house. Again, where the gentleman who spoke in9favor cited numerous studies, and to be honest I don't care10about property prices or anything, the only thing I care11about is the health of my family. And there is a plethora of12undeniable evidence to the association of exposure to13everything that these gallons of gasoline will bring and14development of diabetes, hypertension, cardiovascular15disease, strokes and a four-year-old and two-year-old don't16deserve to be exposed to that. My wife and I had a choice17when we are were scouting areas to buy a house because we18knew we would be staying there the next six, seven years. Do19we buy closer to Mid-America Heart Institution, Children20Mercy Hospital Downtown? But we didn't want to go down21there. We wanted to be outside so our kids can be exposed to22cleaner air, they can have a back yard they can we feel23safe sending them out, they can play freely without myself24being worried about them getting exposed to all these fumes.25So I really plead you to think of our family	1	here, anywhere now because we just bought this property less
4 training. So I just plead to consider the impact of this 5 proposal on the residents. And I feel like we are the one 6 family that is going to be affected the most because that is 7 our house right over there, the first house you see behind 8 that is our house. Again, where the gentleman who spoke in 9 favor cited numerous studies, and to be honest I don't care about property prices or anything, the only thing I care about is the health of my family. And there is a plethora of 10 undeniable evidence to the association of exposure to everything that these gallons of gasoline will bring and 14 development of diabetes, hypertension, cardiovascular 15 disease, strokes and a four-year-old and two-year-old don't 16 deserve to be exposed to that. My wife and I had a choice 17 when we are were scouting areas to buy a house because we 18 knew we would be staying there the next six, seven years. Do 19 we buy closer to Mid-America Heart Institution, Children 20 Mercy Hospital Downtown? But we didn't want to go down 21 there. We wanted to be outside so our kids can be exposed to 22 cleaner air, they can have a back yard they can we feel 23 safe sending them out, they can play freely without myself 24 being worried about them getting exposed to all these fumes.	2	than a year ago and we are here for like as I said, my

24 being worried about them getting exposed to all these fumes.	22	cleaner air, they can have a back yard they can we feel
	23	safe sending them out, they can play freely without myself
25 So I really plead you to think of our family like they would	24	being worried about them getting exposed to all these fumes.
	25	So I really plead you to think of our family like they would

1	think of their family and think twice before they think this
2	proposal merits approval. And just my only argument as I've
3	stated earlier is just the health impact. And there is
4	undeniable evidence in all reading medical journals and I can
5	cite those studies and bring those papers, engineers
6	absolutely, there was actually a review article in biggest
7	heart journal published eight months ago that summarized all
8	of the evidence, and I think that in itself should be enough
9	for the council to really consider not doing this proposal.
10	Thank you.
11	MAYOR SUTER: Thank you. Next.
12	MS. CLAYBORN: Hello, my name is Niesha,
13	N-i-e-s-h-a, last name C-l-a-y-b-o-r-n. I reside at 7042
14	North Olive, 64118. I am a full-time student at the
15	University of Missouri Kansas City double majoring in
16	psychology and communications. So words are going to fail me
17	and my public speaking is still a little bit sub-par so I
18	decided to just write this down. First I would like to
19	thank and I would like to first apologize for my attire.
20	It is a bit informal. I've been on campus all day. But I
21	felt the important need to be here tonight to address my
22	concerns with the panel as well as my fellow attendees. So
23	thank you for allowing me the opportunity to voice my
24	concerns again. And I am especially grateful after six years
25	of living in Gladstone that I finally get to meet my City's

1	mayor. So my political science professor, Dr. Melon, will be
2	proud. I will tell him that tomorrow. So most of us are
3	familiar with a city called Liberty. Not too long ago
4	someone came up with the brilliant idea to suffocate those
5	poor people with over-consumption of retail shops and it's
6	just cluster F to get through, right? So I'm not
7	particularly versed in when it Comes to the political aspects
8	of approving these sorts of things these, cites, however I do
9	know when this happens, the city is in some capacity being
10	compensated. So Gladstone doesn't need another gas station
11	on this small strip that we have. So there are gas stations
12	that serve our city from the north part of Antioch to the
13	east part of Antioch that is doing pretty significant for
14	itself I believe when I go. I ask you to keep in mind we do
15	have those gas stations located in these areas and we did at
16	one point have gas stations in that particular place which
17	was a QuikTrip. So it didn't turn out too well. I don't
18	think it will do that well this time. I understand the needs
19	to be able to occupy this space over here, Mr. Cascone. I
20	just ask that you consider a different option besides putting
21	another gas station. We really don't need it, okay? I
22	respect you. You've been around for a long time. I love
23	your family restaurants. So I just want to say that. So
24	please allow Antioch to be a smooth free-flowing street. We
25	don't need that congestion over there, please, I beg of you.

And, lastly, thank you for your time -- please consider the
 harm we continue to create in our environment by allowing
 another barrier like climate control by building another gas
 station. Thank you all for your time.

5 MR. ALLEN: Matthew Allen, 6001 North Michigan. Just a few points. Like Niesha said, between 72nd and Vivion 6 7 we have four gas stations there. As one of the 27,000 cars I 8 don't have any trouble fueling my car. As a young husband, 9 any of the real estate along Antioch I would be interested in 10 would be family businesses like restaurants, family day care, 11 or businesses in the arts, similar to Antioch Music that 12 closed in 2010. And the only thing that came up was when 13 Counsel Member Yarber brought up the meeting he had on the 14 climate change, and to his point, I just think that this 15 might be the time for our property owners and our City 16 Councils to start considering to entice electric fueling 17 stations like Tesla instead of fossil fueling stations. 18 Thank you.

MS. IMRAN: My is name is Sehyr Imran. S-e-h-y-r i-m-r-a-n. I live at 129 the Woodlands. You met my husband earlier. He spoke at length about the health aspects about our family life and those impacts. A couple things I would like to discuss are refuting a couple of points that were made by those in favor of this proposal. And so one point that was made earlier was that it is permissible and

306 S.E. 291 Highway – Suite 5 Lee's Summit, Missouri 64063 www.kansascity-courtreporter.com

1	therefore we should approve this plan. And I feel that that
2	is equivalent to saying, just because it is allowed, I'm
3	going to do it. And that is not how we should live our
4	lives, I feel. The second point that they made was northwest
5	and south are commercial areas so let's make this commercial
6	as well. And that's similar to saying, just because they are
7	doing it, I want to do it. And it's also similar to saying,
8	I got support from the surrounding businesses, and that to me
9	sounds like my friends said it's okay, so let's go ahead and
10	do it. I am a pediatric pulmonologist, so I am a certified
11	pediatrician and my area of passion and specialty is
12	children's lungs. My husband spoke to the cardiovascular
13	aspects of it. My son himself has asthma so I have stayed up
14	many nights not just with patients in the hospital but with
15	my own son at night checking his respiration, seeing if he is
16	breathing okay. And as you all know, the air quality is one
17	of the major determinants of how it affects our respiratory
18	illnesses, our airway health as well as asthma, which I'm
19	sure, as the statistics show, you or someone you love or one
20	of your friends has asthma or has dealt with it or has been
21	to the ER or urgent care seeking treatment, just because you
22	can't breathe. And that's no way to live. Imagine holding
23	your breath for 15 seconds, what do you do? You come up for
24	air. You just can't choke yourself just because it's such a
25	primitive response to want to breathe. We get air hungry.

1	Imagine how asthmatics live and how having a gas station just
2	in our back yard is going to affect the air quality. The
3	last point I wanted to make was the ozone layer and the water
4	seepage. As we know, those in favor of this proposal have
5	said that there is going to be minimum layer and minimum gas
6	leak risk. What is the risk right now when there are no
7	underground oil reservoirs? Zero. Regardless of what
8	safeguards we put in place, we can never say that with a gas
9	reservoir in place the risk is zero. So I agree that the
10	vacant lot is not appealing. Why don't we steer the
11	conversation into an eco-friendly alternative as opposed to a
12	gas station. Just because a gas station is a lesser of the
13	two evils when compared to a vacant lot doesn't mean you have
14	to choose it. We can choose something better. We need to
15	give back to mother earth. But what we are proposing to give
16	back is not worth giving back at all. That is all. Thank
17	you.
18	MAYOR SUTER: Thank you. Next.
19	MS. THEISSEN: Berna Thiessen, T-h-e-i-s-s-e-n. I
20	am at 123 the Woodlands. So on the picture I am the far
21	right side, but I'm still within, captured within the
22	picture. I spoke at the last Council meeting. I have great
23	concerns with the gas station going in because I have four
24	children. We bought this home to raise our kids in that I
25	adopted from foster care, and it is my job to protect them

1	and now it's just very I got upset last time. I am going
2	to always get concerned when I'm concerned about my kids'
3	welfare, the environment. I understand globally it is a
4	concern right now. But it is a concern in my home and it is
5	all of these reservoirs they talk about. All that that leads
6	me to believe is that it's not if a spill will occur, it's
7	when and what direction it will go in. Even if it goes in
8	the wrong direction, I don't want it near my property. I
9	can't find any medical studies that confirm that having a gas
10	station is beneficial. I would say, if anything, it is
11	completely the opposite. I think more studying needs to be
12	done in the area. And as you know, with all the current
13	climate change research they are doing, there is a lot of
14	unknowns here. And so the only known that I truly believe is
15	that having a gas station is going to negatively impact my
16	children. And, I mean, it's four children. We all have big
17	families. That is why we bought homes in the Woodlands. We
18	didn't buy homes so a gas station would be put in. So just
19	continuing to be concerned. I am very opposed. And I just
20	hope that you all will take that into consideration and think
21	would you want to live that close to a gas station? Would
22	you feel that your grandkids were safe life living that close
23	to a gas station? I would say the answer is no. I don't
24	know anyone that would choose that. I hope you guys take
25	that into consideration.

1	MAYOR SUTER: Thank you. Sir?
2	MR. CHAPMAN: My name is John Chapman. I live at
3	118 the Woodlands. I spoke to you last year before your vote
4	also, and I want to speak again. So I've been concerned
5	about the gas station and its effect on not only my house but
6	also my neighbors, specifically the ones that live very close
7	to the fence that border this property. So I've done some
8	research and I started by just going on line and looking at
9	gas station pollution. And one of the things that comes up
10	right away is articles about benzene. So what is benzene?
11	Benzene, I'm not a chemist, but it is a colorless, odorless
12	liquid and it is a carcinogen. That means it causes cancer.
13	It is particularly dangerous to young children. That is why
14	states have got set backs where you can't have a gas station
15	located within 300 feet of where children play or live.
16	Studies have been done, this is a known quantity. So where
17	do we get benzene from? What are the risks? There are two
18	primary sources I've read about. One is cigarette smoke and
19	the other is gasoline. So we all know about cigarettes,
20	right? That's pretty simple. So how do you take that out of
21	your life? Well, you don't smoke. If you did smoke, you
22	quit. But what do we do about the gasoline problem? Well,
23	the articles that I read propose three different
24	possibilities. One is you shouldn't work at a gas station.
25	That is literally in several of the articles, one by the

1	American Cancer Society that literally says, You shouldn't be
2	a gas station worker. It is a risk. The other is, and this
3	one really shocked me, is that you should fuel safely. Now I
4	want you to think about that for a minute. And most of us go
5	to the gas station about once a week, depending on our
6	driving habits, once every seven days we are at a gas station
7	for five to 10 minutes. And the American Cancer Society is
8	telling us, hey, that is dangerous. Be careful. Right? So
9	in other words, don't breathe deeply, don't get a big you
10	know gulp of air when you're gassing up. Now, that's an
11	admonition to people at a gas station for five minutes once a
12	week. What about my neighbors that are $24/7$ going to be
13	downstream from this gas station? And then the last thing
14	they say, the third one is, and that is why we are here
15	tonight, don't buy a house near a gas station. That is all I
16	have to say. Thank you.
17	MAYOR SUTER: More?
18	MR. SINGH: Good evening, Mayor. Good evening,
19	Council Members. Everyone else. I'm Gurcharan Singh, I'm
20	the owner of Conoco, 15810 East Antioch. G-u-r-c-h-a-r-a-n
21	and the last name is S-i-n-g-h. I just wanted to start off
22	with a brief issue for a gas station that has been we took
23	this over about five years ago and recently in the last six,
24	seven months we've started the up-dates on the plan that
25	we've been trying to go through for about three years. And

1	the location itself, the gas station has been there about 30
2	years, so this is not a complete new proposed gas station
3	location there, so it has been there for a long time. We are
4	just upgrading it now. And we are investing a lot of money
5	into this right now, \$1.6 million into this site. And
6	between Englewood and 72nd Street we have three gas stations,
7	which is about a two-mile stretch. And we have two smoke
8	shops in there. We have multiple other retailers that carry
9	liquor and tobacco products. So I don't see anything
10	proprietary in this proposed plan that we have here tonight.
11	I'm just trying to make a point that there isn't really much
12	need for a gas station. I feel like it is going to reduce
13	the property values around the neighborhood and we've already
14	sheen how un-approving the local neighbors have been in the
15	past. And even tonight we've seen the disapproval from them.
16	And so I would like to say that there are probably other
17	great uses for this property besides a gas station. So
18	please take into consideration. Thank you so much.
19	MAYOR SUTER: Thank you, sir. Any others? Sir?
20	MR. CLYMORE: My name is Joe Clymore. I'm at 127
21	the Woodlands, right directly behind the current what was
22	the restaurant. And I'm pretty sure we've been there for
23	16 years. I'm pretty sure that we wouldn't have bought the
24	house there 16 years ago if it had been a gas station behind
25	the house. We really have concerns about being that close to

1	gasoline. I know Jack, one side, he has kids, and the new
2	couple, they probably took the kids home, they were on the
3	other side, and they've got small children. Well, I've got
4	six grandchildren between two and nine, and they spend a lot
5	of time at our house. And I, as they felt, I have a real
6	concerns about the gasoline fumes and gasoline spills. And I
7	used to work in a gas station. We would get a lot of spills.
8	It would run over. I don't think it is as common as it used
9	to be. But you would put put the nozzle in the tank and
10	you go wash the windows and first thing you know the thing
11	runs gas all over the ground. So, anyway, really like you to
12	really think hard on the gas station. Thank you.
13	MAYOR SUTER: Thank you, sir.
14	MS. HUXTABLE: I had one question, since
15	MAYOR SUTER: Name and address?
16	MS. HUXTABLE: Angel Huxtable, 3104 Northeast 65th
17	Terrace, Gladstone. When he was talking about the
18	development they were doing, he said it wouldn't be bringing
19	in new traffic to the city, is that right? If it's not
20	bringing any new traffic and it is not bringing any more
21	revenues, then what would the point of doing it at all except
22	for the risks? Because the City is not going to make any
23	more money. They are just going to separate the other
24	businesses, and people like myself will be moving out of
25	town. So you will actually be losing. So wouldn't it be

1	
1	better but Mr. Cascone is a wonderful man and he makes
2	excellent food so I'm sure he'll come up with a better
3	plan.
4	MR. McINTOSH: John McIntosh, 135 Woodlands. I came
5	here about a year ago, I came before the Board to voice my
6	opposition against this particular site development. And as
7	some of my fellow community members have expressed, you know,
8	usually when you come and develop something you have a need
9	for it. There is a supply and there is a demand. And so
10	what I did, I just looked I took a drive along Antioch
11	which is also Highway One, and so we start at Antioch and the
12	I-35. You have a Phillips 66 gas station there. And then if
13	you go eight tenths of a mile north to Antioch and Vivion,
14	you have a QuikTrip. Then if you go another one mile north,
15	you have the Conoco gas station that is owned by the
16	gentleman who just spoke. That is three. Then if you go
17	another 1.3 miles down to Highway One and Avenue 72, you have
18	two gas stations. A QuikTrip and a Hy-Vee. Five gas
19	stations within 3.7 miles of each other. Now, Mr. Cuda and
20	his team wants to develop another one from the Conoco station
21	which is at Antioch and Kendallwood Parkway, down to I
22	can't remember the name of the street Chestnut, and that
23	is I think is about eight tenths of a mile. I don't see the
24	need for it. Councilman said there is 27,000 vehicles that
25	drive up and down in there, but, you know what, I drive up

1	and down there every day and I've never seen those gas
2	stations so busy where nobody has can just come in and get
3	their gas. So the need is not there. And I think one thing
4	we are overlooking as we come up and discuss this and we
5	all understand that they have a right to come in and develop
6	this. That is not our argument. But I think the thing we
7	are missing is the human aspect of this. I was here at the
8	City planning meeting last month or a couple of months ago,
9	and after we came up and voiced our voices pro and con
10	against it, then the Planning Commission gave their reasons
11	why they should okay this particular site development. And
12	one of the gentlemen, my antenna came up when he spoke, and
13	he said this, and I'm going to I can't remember, but it is
14	in the transcript the minutes if you were to read the
15	minutes from that, but the gentleman sat right here on the
16	end, I think he was the second from the end, a burly fella
17	with a beard and he said this, he said, since the age of 14
18	I've worked at gas stations and gas been all on my hands and
19	I've been dirt nothing has ever happened to me. I thought
20	he was very disingenuous to say that. Just because it
21	didn't he hasn't had any problems, well you tell that to a
22	mother whose child might have a preexisting condition and
23	tell that to her. Or I don't want to ask for a show of
24	hands, how many of, you know, that somebody, one person in
25	the family smokes cigarettes and the other person don't and

1	the one that don't ends up with the cancer. So he is going
2	to sit there and have the audacity to say because he worked
3	around gas that it's not going to affect anybody else. He
4	ought to be ashamed of himself to say that. So we need to
5	look at the human side of this rather than the legality side
6	of this. Because we know that he can do it, and my
7	suggestion to Mr. Cascone, and I respect him for living here,
8	he has tenders[sic] here and we all understand that, I
9	respect that, but I would tear the place down if somebody was
10	just coming in and breaking in and living there, tear it down
11	completely, you won't have that problem anymore. And sell it
12	to the City. Sell the land to the City and then we can
13	develop it into something. There is other options than just
14	coming in with a gas station. There is other options we can
15	do. So with respect to Mr. Cuda, the well developer that he
16	is, well, you know, if you go down the highway into 152, they
17	are starting some new development down there. Why don't he
18	go down there and develop a gas station? He'll have it all
19	by himself. I know Quick Pick is putting one, he can be on
20	the other corner and that is exactly Highway One to 72,
21	from 72 to Highway 152 is 1.6 miles. No gas stations. He
22	can go right down and develop all he want. And I'm sure he
23	will be welcome down there in that community. But why does
24	he want to come and mess with our peace and tranquility we
25	have? He hasn't came to us and asked what do we want as a

1	
1	community. Why hasn't he come sit down with us, say you
2	don't want a gas station, what can we do? What can we get
3	together and negotiate to find something I can put here that
4	will satisfy the community? No. He just want to force
5	something on us. That's not the way it works. This is our
6	community. We live there. Now, it was asked by counsel how
7	many people here is in opposition, so I think I have the same
8	right I mean, how many people are for the project, I would
9	like to ask how many people who are in opposition to this
10	project, would you please stand? And live in the community.
11	And live in the community. Thank you. So you see, we have
12	people here that support it also. And we want you to look at
13	the human side of it rather than just the legal side of it.
14	It's okay to drink, but it is not okay to drink and drive.
15	Thank you so very much.
16	MAYOR SUTER: Thank you very much. One more.
17	MR. SMITH: My name is George Smith. I am 133 the
18	Woodlands. I serve the City of Gladstone on the
19	Environmental Management Advisory Committee. And therefore
20	the environment is very important to me. I think some of
21	these previous speakers have done a great job explaining the
22	concerns about benzene. My other concern that has not been
23	approached yet is the safety on Antioch Road. When you pull
24	out of McDonald's, you are taking your life in your hands.
25	There is a little rise in the road there where you can't see

and cars are coming too fast, it's dangerous, now we are
 putting in a laundromat we are putting in a Wendy's and now
 we want to put in a gas station. There is going to be
 entirely too much traffic in that very short stretch of road.
 I am opposed to it, and I hope you will join me.

MR. MEYER: Good evening, Jonathan Meyer. 6 I live at 7 145 the Woodlands. Several other members of my community 8 have been very eloquent and touched on a lot of the points we 9 have discussed in a lot of our meetings. My wife Erin and I 10 are relatively new to Gladstone. We moved down from the 11 Harrison County area. My wife has contracted for several 12 years with the North Kansas City School District as an 13 orientation and mobility specialist. She works with students 14 in the district that are blind and visually impaired, teaches 15 them how to travel safely. When we made the decision to 16 relocate to the area, we first purchased a duplex just 17 outside of Gladstone so we could take time and find the right 18 home. We believe we've done that, we did that in the summer 19 of 2018. At that point there was not a heavy discussion 20 about the potential for a gas station right on the edge of 21 the neighborhood we were looking at relocating to with our 22 three children. The -- I'm familiar with Gladstone because 23 growing up my aunt and uncle lived in the community and were 24 teachers in the district and we got to spend a week at a 25 time, my sister and I both, come down and got spoiled by my

1	aunt and uncle. And it is a very nice community, a very
2	forward-thinking community. And looking on the website and
3	seeing there was a comprehensive plan set forth that looked
4	at how the community should develop and in that comprehensive
5	plan section 3.2 outlined some of the key planning issues
6	that the City was going to look to when developing and
7	building the community and reaching into the next millennium,
8	some of those were the new developments should be compatible
9	with the character of existing neighborhoods. That as older
10	commercial sites are re-developed, those properties should be
11	considered for new residential in-fill housing options. That
12	new development and redevelopment areas should include
13	pedestrian features and amenities that encourage walking from
14	nearby residential areas and there should had been community
15	sustainability encouraging green infrastructure and
16	buildings. So the council and the development group that
17	came up with this plan and strategy looked to those safety
18	concerns and viability of the community going into the
19	future. And in that comprehensive plan there is a future
20	land use map. In Section 311, this area that we are talking
21	about is right in the middle of an area that was proposed to
22	transition from general commercial to mixed use. Mr. Cascone
23	outlined a myriad of commercial endeavors that indicated this
24	particular site is not a desirable commercial location. It
25	would be appropriate for the City Council to follow that

1	comprehensive plan and transition this area to a mixed use.
2	One of the individuals mentioned the issues with maintenance
3	that they are seeing from the McDonald's location, and one of
4	the slides in this presentation showed the condition and the
5	maintenance of the building, the rear of the building
6	neighboring the neighborhood during a time when they are
7	actively marketing this property for sale. Why should we
8	believe that that lack of maintenance is not going to
9	continue with the development that that owner is proposing?
10	I would ask you to strongly consider not approving this site
11	plan revision. Thank you for your time.
12	MAYOR SUTER: Thank you. Anyone else who wishes to
13	speak?
14	MS. KUENZEL: Good evening, my name is Carol
15	Kuenzel, K-u-e-n-z-e-l. I live at 138 the Woodlands. I've
16	been a resident of Gladstone and the Woodlands community
17	since 2005. Before I get into my concerns about the proposed
18	site development, I want to thank you for the opportunity to
19	speak to you tonight. And I also want to thank the Council
20	and compliment the Council and the city staff on all the
21	great things you've done in downtown Gladstone. The Linden
22	Square and the summer concerts, my husband are there almost
23	every Friday night. Stone Canyon Pizza and the Summit Grill
24	and the iWERX, all of those are great additions to our
25	community, and I really appreciate those. And I also want to

1	say thank you to the City staff for always being responsive
2	to any questions I have directed to them. I have called
3	Austin several times and he has always been very he always
4	answers his phone, which kind of surprises me. And he has
5	always been really gracious to answer my questions, even if
6	they stray to strange things like goats, right? I attended
7	the June 24th meeting with Mr. Cuda and his legal staff, and
8	I also attended the Planning Commission meeting. So I want
9	to address a few things. Jonathan touched on some of them
10	because at the Planning Commission one of the commissioners
11	stated, did the proposal under consideration meet zoning
12	requirements and did it meet the requirements of the master
13	plan? So not knowing what the master plan was, I called
14	Austin and said, Can you tell me what this master plan is?
15	So what he did, he directed me to the Gladstone website and I
16	could access it there, and it was all 211 pages of it, which
17	I would say I read most of that. So I really wanted to frame
18	my comments about some of the things that were in that
19	comprehensive plan. So Jonathan mentioned that this property
20	sits right in kind of the middle of the Antioch Road Highway,
21	One Highway corridor. And the plan states that this corridor
22	serves as a primary north south travel route from I-35 to
23	M-152 highway. For Gladstone to continue to be a thriving
24	community in 2030, it is important to focus on strategic
25	revitalization and redevelopment opportunities in the

1	corridor that will maintain the health of existing
2	neighborhoods and provide necessary services and retail needs
3	of the residents. And it also states that those improvements
4	should safely accommodate all users, including pedestrians,
5	bicyclists, transit riders, children, older individuals,
6	disabled individuals and motorists. George happened to
7	mention the amount of traffic, and that is the first thing I
8	want to address, the safety concern of the amount of traffic
9	that is in that concentrated area. If you get in your car
10	and you drive north from the stop light there at Brooke Tree
11	Lane, you travel about half of a block before any traffic
12	starts coming in and out of Antioch Road. You then get
13	traffic that comes in from North Chestnut. You could hit
14	traffic that will come in from the Wendy's. You have traffic
15	that comes in from the McDonald's. You have the new
16	laundromat. You have Antioch Road that curves off. And you
17	have Commerce Bank that is all in probably the amount of room
18	that is a football field. That is a lot of in-and-out
19	traffic. If you would turn around and come back down 64th to
20	Brooke Tree Lane, you have, on that side of the road you have
21	the ballet school that is a commercial property. You have
22	two auxiliary roads that feed into that site which are I
23	think North Wabash and Northeast 63rd Place, and you have
24	eight residential units that the only way in and out of those
25	properties are their driveways that feed into Antioch Road.

1	So with 27,000 cars that are going up and down that road and
2	added traffic that is going to be coming in and out if this
3	gas station is successful, that is just dumping a lot of
4	traffic into that one concentrated area. The other thing a
5	lot of our people have touched on is that really the need for
6	this type of service. We already have five gas stations.
7	Three of those are in Gladstone. Let's not take a pie that
8	is this big and divide it up by six people now instead of the
9	five. We are not bringing I don't see bringing any more
10	tax revenues into our city, it is not bringing non-residents
11	into our city that is going to spend money someplace else.
12	It was also touched upon the property values that are next to
13	and abandoned. You've heard several residents say, I don't
14	want to live there with my small children, maybe they decide
15	to sell their properties and sell it for a low price. That
16	does affect my property value, because should I want to sell
17	they are going to look at that comp. They are going to look
18	at what that property sold for and establish a value for
19	mine. So it does have an economic impact on all of the
20	residents. And then my last thing is at the December council
21	meeting Mayor Suter you stated the following, the major
22	success of community is often the measure of trust between
23	the citizens and elected officials, when people make
24	investments in their homes and where they are going have
25	their families live and be raised, that is based on the trust

1	of the community trust that the community is going to
2	respect those investments and somehow try to preserve them.
3	I served as treasurer of the Woodlands Homes Association the
4	last three years and I wanted to share with you the
5	investments our residents have made in our community through
6	paying their homes association dues to help value maintain
7	the values and improve the assets of our community. In the
8	last three years we've spent \$125,000 on our community.
9	These are on assets of our community that we saw that needed
10	to be either improved because they were deteriorating our
11	community is 30 years old. But we have replaced a fence
12	along Brooke Tree Lane, that was \$15,000. We've resurfaced
13	our pool parking lot, that is \$15,000. We repaired a stucco
14	wall on the east and west sides of our neighborhood entrance,
15	\$37,000. We renovated the gate house at our main entrance.
16	That was \$20,000. If you are familiar with our neighborhood,
17	we have an abundance of trees in our neighborhood and that is
18	why so many of us love our community. We've also implemented
19	a comprehensive tree program that addresses, you have a tree,
20	you gotta take care of it. So pruning our trees, removing
21	our dead and deceased trees. We started a program on our ash
22	trees where we are removing all of the deceased and dying ash
23	trees. And the ones that the arborists identified as being
24	savable, we've started a treatment program for those. So for
25	the next three years our neighborhood is going to be spending

1	an additional \$58,500 on capital improvement projects, and
2	that is not in addition to probably an additional amount
3	on our trees. So in closing what I would just wanted to say
4	is, as stated in the your competency plan, Gladstone on
5	the Move, the goal was to build a future of which Gladstone
6	realizes its full potential as the ideal 21st century
7	community and we become the jewel of metropolitan Kansas
8	City. I would like to ask the council to help us keep our
9	neighborhood the Woodlands safe, economically sound, and for
10	it to be the jewel of Gladstone by voting no on the proposed
11	site proposal plan. Thank you.
12	MAYOR SUTER: Anyone else? We are on opposition.
13	Anyone else who wants to speak in opposition? Any additional
14	information, council? Questions? I would like to ask our
15	City Counselor Chris Williams to make a comment.
16	MR. WILLIAMS: Mayor, we would like to enter some
17	documents into the record as exhibits, if you don't mind.
18	Exhibit 1 are the documents that are included in the council
19	packet for the public hearing this evening. Exhibit 2 is
20	Title VII zoning and planning, zoning and land planning
21	ordinance of the City code. Exhibit 3 are the newspaper
22	publication notices of the public hearing for this evening.
23	Exhibit 4 is the PowerPoint presentation by Mr. Bowers at the
24	public hearing. Exhibit 5 are the December 10, 2018, City
25	Council meeting minutes regarding the previous site plan

1	revision application. And Exhibit 6 are the letters in
2	support of the project presented at the public hearing by Mr.
3	Bowers.
4	MAYOR SUTER: Thank you. All those items exhibits
5	will be accepted for the record. Duly noted. Thank you.
6	All right. If counsel is set, then we are going to close
7	this public hearing.
8	(Hearing closed.)
9	MAYOR SUTER: Thank you so much for everyone who has
10	participated. It is very helpful for us to hear from all
11	sides, every time that we entertain a proposal for just about
12	anything in the city. Following the hearing you'll notice
13	Item 18 is first reading of Bill 19-41 which is an ordinance
14	to approve the site plan revision for 6221 North Chestnut.
15	I'll entertain a motion.
16	COUNCILMAN MALLAMS: I move to accept the first
17	reading of the bill 19-41 correction, Mayor Suter, I move
18	to place bill Number 19-41 on its first reading.
19	(Motion seconded and carried.)
20	(Madam clerk read bill. )
21	COUNCILMAN MALLAMS: I move to place the bill on the
22	second reading.
23	(Motion seconded and carried.)
24	(Madam clerk read bill.)
25	COUNCILMAN MALLAMS: I move to accept the second and

1	final reading of bill Number 19-41 and enact the bill as
2	ordinance Number 4.492.
3	(Seconded.)
4	MAYOR SUTER: Discussion?
5	MR. YARBER: I will go first, I certainly I
6	respect Mr. Cascone's commitment to the Northland, also
7	greatly love his fettuccine alfredo. Kudos to Chuck Cudo for
8	developer, as a developer. The operator, this is, you
9	operate a place exactly the way we would want it operated. I
10	think I highly respect how you come in and make a business
11	successful. The changes that you propose to the building are
12	great, the landscaping, all of these things are great, except
13	for one thing, the location. We have a business that by its
14	nature is a dispensing a liquid that is by the nature of
15	gasoline easily evaporated. When it burns in a vehicle it
16	actually becomes fumes so. The fact that it is fumes is what
17	gasoline is supposed to do. And so even in the best case
18	scenarios, you are still introducing benzene to the
19	neighborhood. It is odorless. It is colorless. You won't
20	know if your kids are playing out in a yard breathing it. We
21	did approve changes to a station, certainly since my time on
22	Council, but as was pointed out, this is an existing station.
23	The people that moved into the neighborhood sometime in the
24	last 30 years were well aware that there was already a gas
25	station there. No one I don't think anyone anticipated

1 when they moved in into their current neighborhood that in the Woodlands that the right across their back yard fence 2 would be a gas station. So for that there are certainly 3 4 other issues I could bring up, but that alone I will be a no 5 vote on this. MAYOR SUTER: All right. 6 7 COUNCILMAN MALLAMS: I would like to thank everyone 8 for sharing your values, your beliefs this evening. The 9 project involves amending a site plan. It does meet city 10 requirements. I believe that there have been significant 11 revisions that have been agreed to. Again, I see both sides 12 of this situation. But I will say that I will vote in favor 13 of support of the site plan revision. 14 Thank you. Mayor Pro Tem. MR. CHAIRMAN: 15 PRO TEM MAYOR MOORE: As the Council representative 16 to the Planning Commission, I have had the opportunity to 17 hear this testimony multiple times. This is a difficult 18 decision and one that I do not take lightly. I have been 19 approached multiple times to be in favor of this development 20 by good neighbors who are here tonight. I have the utmost 21 respect for the Cascone family and the deep roots and 22 contributions to the Northland and specifically to Gladstone. 23 However, I continue to be extremely concerned about the 24 negative impact and material injury that this proposed 25 development will have on this adjacent community. Especially

1 in terms of health, the environmental impact, and traffic. 2 For these reasons, I simply cannot support this site plan revision. 3 4 MAYOR SUTER: Thank you. Councilman Garnos. 5 COUNCILMAN GARNOS: Thank you, Mayor. My comments and concerns on this issue are the same as when this issue 6 7 was before us on December 10th, 2018. Even though we were 8 blessed with a 247 page packet for tonight, it didn't include 9 the minutes from the previous time we discussed this, and I 10 am pleased that that has now been added to the record. So I 11 would like to simply refer to my previous comments on the 12 record and not go over the same thing I said when this was 13 before us before. I haven't seen anything new since then 14 that would cause me to change the vote I made at that time. 15 I'm sorry for the residents of the Woodlands who oppose this. 16 I applaud their effort to bring their concern to City staff 17 and to the Planning Commission and to the City Council. I 18 appreciate the concerns. I really do. I'm a parent also. Ι 19 don't want a gas station there either. But this application 20 has been in compliance with our zoning requirements. It has 21 been recommended for approval by City staff twice. It has 22 been recommended for approval by the Planning Commission 23 twice. And the developer has agreed to 15 specific terms and 24 conditions for its approval. I would also note that now that 25 we have the privilege of having attorneys involved in this, I

1 don't want to subject the City to any unnecessary or costly 2 litigation over this issue. And on that basis I'll be voting again to approve the project. Thank you. 3 4 MAYOR SUTER: Thank you, Councilman Garnos. Last 5 word goes to the mayor. So I want to reiterate I appreciate 6 your reading my own comments from my last -- from our last 7 meeting, because I echo those. And as Councilman Garnos said, I don't need to say all that again. So if you haven't 8 9 seen that, read the minutes. I do believe that the public 10 trust is the key to a successful community and that's what we 11 are here to serve and to do. Several things of course are 12 different for me, and I think for all of us on Council since 13 the last meeting, and that is that a great deal of material 14 has been provided, a lot of research. And we have all had 15 this for some time. So Council members have had the 16 opportunity to review everything that was submitted. Let me 17 first address a few of the items that have come up in the 18 course of this conversation. I too appreciate interest in 19 investing in Gladstone and making this a successful 20 community. All of us of course have chosen this community 21 for its quality of life. Whether you've lived here for 50 22 years or for two years, or for eight months, as some people, 23 we all made that same decision. And I think more and more in 24 recent times Gladstone's unique progressive invigorating kind 25 of revival is the reason that more and more people are

1	interested in moving here and why the real estate values
2	continue to be high here. But a number of things I said are
3	different. One, the issue about the Planning Commission
4	giving its approval, and it's hard for citizens to understand
5	but Planning Commission has a different job from the City
6	Council, and they have a very narrow purview about land use.
7	So the fact that this property is already zoned is kind of
8	most of their issue. The City Council is empowered to
9	consider other considerations in the health and well being of
10	the community. So we are not bound by the Planning
11	Commission's decisions are really just recommendations to the
12	City Council. They are not effective in any other way
13	legally. They are just recommendations like all of our
14	boards and commissions pretty much make recommendations to
15	the City. I appreciate the struggle with trying to find an
16	appropriate use for this property. The City has gone through
17	that same kind of struggle as we've developed downtown. Like
18	to look at Summit Grill as kind of one of those good
19	examples. The City actually leases that space. We have
20	leased it since the Heights was built. And we have hung in
21	for five years of paying rent on empty space and we've turned
22	down proposal after proposal for things we knew the community
23	did not want to go in that space. We knew we wanted a full
24	service used to call it white table cloth but nobody does
25	table cloths anymore restaurant and full service bar, and

2and we have one of the finest facilities in the entire3Northland. And so having patience, yeah, pays off a few4months, I'm I feel sorry for you because I know money is5at stake, but it is not causing me to stay up at night6because we've invested a lot more time and patience waiting7to develop things we want in Gladstone, and on Antioch there8is Applebee's, which is, as far as I know, a full service9restaurant that seems to be successful in its spot serving10lunch and dinner. So there are other opportunities there.11The concern about the maintenance of the property, I've been12on Council almost 13 years, and this is one of my bugaboos13that I do get on staff about from time to time, we put a lot14of conditions in these proposals and it's always about15landscaping and maintenance and this and that, and I have to16admit that more often than I like to see that the conditions17are not met. And we spend a lot of time and energy for years18with code enforcement making people do the things that they19said that they were going to do in these proposals. So I21also have to say I look at those conditions with a bit of22feet tall already. They aren't going to be that for a very23long time. They are not all going to survive. They are24going to die. And then we have to start over again. That25kind of stuff just happens all the time. The fact that the	1	we hung in and it cost us, but the payoff has been fabulous
months, I'm I feel sorry for you because I know money is at stake, but it is not causing me to stay up at night because we've invested a lot more time and patience waiting to develop things we want in Gladstone, and on Antioch there is Applebee's, which is, as far as I know, a full service restaurant that seems to be successful in its spot serving lunch and dinner. So I 20 also have to say I look at those conditions with a bit of 21 skepticism. It would be nice if trees could be planted 20 22 feet tall already. They aren't going to be that for a very 23 long time. They are not all going to survive. They are 24 going to die. And then we have to start over again. That	8	is Applebee's, which is, as far as I know, a full service
The concern about the maintenance of the property, I've been on Council almost 13 years, and this is one of my bugaboos that I do get on staff about from time to time, we put a lot of conditions in these proposals and it's always about landscaping and maintenance and this and that, and I have to admit that more often than I like to see that the conditions are not met. And we spend a lot of time and energy for years with code enforcement making people do the things that they said that they were going to do in these proposals. So I also have to say I look at those conditions with a bit of skepticism. It would be nice if trees could be planted 20 feet tall already. They aren't going to be that for a very long time. They are not all going to survive. They are going to die. And then we have to start over again. That	9	restaurant that seems to be successful in its spot serving
on Council almost 13 years, and this is one of my bugaboos that I do get on staff about from time to time, we put a lot of conditions in these proposals and it's always about landscaping and maintenance and this and that, and I have to admit that more often than I like to see that the conditions are not met. feet tall already. They aren't going to be that for a very long time. They are not all going to survive. They are going to die. And then we have to start over again. That	20	also have to say I look at those conditions with a bit of
<ul> <li>23 long time. They are not all going to survive. They are</li> <li>24 going to die. And then we have to start over again. That</li> </ul>	21	skepticism. It would be nice if trees could be planted 20
24 going to die. And then we have to start over again. That	22	feet tall already. They aren't going to be that for a very
	23	long time. They are not all going to survive. They are
25 kind of stuff just happens all the time. The fact that the	24	going to die. And then we have to start over again. That
	25	kind of stuff just happens all the time. The fact that the

1	property is not well maintained currently is a concern of
2	mine as well because, if you are trying to sell it, looks
3	matter. So things don't always kind of pan out. Other
4	projects, the other two gas stations that were mentioned that
5	have been expanded or remodels were existing gas stations.
6	If they were coming with a new proposal to put a new gas
7	station, I would be opposed to those. But they were existing
8	gas stations and we are not in the business of running
9	business out of town. We are not in the business of
10	prohibiting businesses from being successful that already
11	exist here. We do value the renewed investment. But mainly
12	I want to talk about health, physical health of the nearby
13	residents and the wider community kind of in general. And
14	benzene was the thing that was kind of mentioned that the
15	applicant quoted California regulations, CARB regulation,
16	that was established in 2005. This is 2019 and a lot of
17	things have changed in the universe, including science and
18	technology and our understanding about the environment around
19	us and all kinds of things. So I kind of equate gas stations
20	and fumes and leakages with cigarette smoking, which people
21	who smoked cigarettes for decades, more than decades, a
22	couple centuries before we admitted it actually killed
23	people. And then it was decades before we figured out that
24	secondhand smoke was deadly for people who live in the
25	environment. And then we figured out that occasional

1	secondhand smoke was deadly. As cities we went through
2	those whole phases where restaurants had smoking and
3	non-smoking sections, well, you can't partition off the air.
4	We are all breathing the same thing. As we all started to
5	ban smoking in public places what we learned was that in
6	every single jurisdiction when smoking was banned the
7	incidents of heart attacks went down in those cities. And
8	that is because even incidental exposure to secondhand smoke
9	can be deadly. And we know that because, as science and
10	technology advances, we get better testing mechanisms. We
11	are able to understand things in smaller quantities. We are
12	able to do longer term studies so we understand the effects
13	of things a lot better as time goes on. So now we know there
14	is no safe way to be around smoke, cigarettes, and now
15	vaping, you know, that was supposed to be the safe way for
16	people to stop smoking, and now we are finding out that it
17	kills and it kills young people. The more we know, the
18	better decisions we can make. And so I'm really persuaded by
19	studies done recently, 2018 by researchers at Columbia
20	University and Johns Hopkins University funded by the
21	National Institutes of Health that say that the presence of
22	benzene in the air is far more prevalent than ever thought,
23	that in amounts we didn't used to be able to measure, go much
24	farther than 100 feet, more than 300 feet beyond gas
25	stations. We've also learned, because we can do testing so

1	much better today, that even the tiniest amounts of gasoline
2	spilled seeps all the way through concrete to get into the
3	earth and then it travels in lots of ways we still don't even
4	understand. The CITY owns a piece of property that used to
5	be a gas station. It has been vacant for at least 25 or 30
6	years and we are still in the process of trying to get the
7	ground cleaned so that that property can be resold. Stuff
8	moves. And it isn't contained by putting up trees or a
9	fence. So I'm very concerned about the health of the
10	residents, especially children. Very little research is ever
11	done on the effects of children of things on children.
12	The other is real estate valuation, because I think at the
13	end of the day you made investments, those people who live in
14	the Woodlands, on a piece of property that happens to be my
15	profession, I am a residential real estate investor. I
16	wouldn't buy property to flip or rent or even live in myself
17	next to a gas station. As people are more and more aware of
18	the health hazards, I think it is a challenge for us in all
19	communities to figure out how we clean up things that have
20	been there for a long time. And how do we find alternatives
21	that can prevent the damage or harm that comes from some of
22	these continuing pollution problems? The quality of the air
23	matters to everyone in the community, but particularly to
24	those of you who live very close. And so I also believe that
25	putting a gas station this close to a residential area is
