Department: Public Works

Meeting Date Requested: 9/8/25

Public Hearing: Yes  Date: [Click here to enter a date.](#)

Subject: Amendment No. 1, 24-inch Transmission Main, Project WP2492E

Background: The City awarded Phase 1 of the project by Resolution R-24-40 to McClure Engineering Co. in the amount of \$12,500.00 to coordinate with MoDOT and the Federal Highway Administration on the location of a new 24-inch transmission main under Vivion Road and I-29/35. Amendment No.1 expands the scope of the project to include detailed design.

Budget Discussion: A financial breakdown of the contract is as follows:

Original Contract Amount:	\$ 12,500.00
Amendment 1	<u>233,700.00</u>
<b>Revised Contract Amount:</b>	<b><u><u>\$ 246,200.00</u></u></b>

Funds are available from the 2024 COP and budgeted in the CWSS Fund.

Public/Board/Staff Input: Staff recommends approval of this Amendment. A total of \$3M is budgeted in the 2024 COP for transmission main upgrades.

Provide Original Contracts, Leases, Agreements, etc. to: City Clerk and Vendor.

# CONTRACT AMENDMENT

## McCLURE ENGINEERING COMPANY

Project Name: Gladstone 24-inch Transmission Main      Date: 8/13/2025  
Project Number: 2024000256-000      Change Order No.: 1  
Project Manager: Steve Query      Client: City of Gladstone  
Original Contract – Professional Engineering Services Agreement Design of 24-Inch Transmission Main – Phase 1 Project #WP2492E signed on August 28<sup>th</sup>, 2024.

**Description of Change(s):** The project involves coordination, design, construction administration, and oversight for a new redundant 24-inch water transmission main for the City of Gladstone, with the goal of improving system reliability by installing a secondary transmission line under US 69 and Interstate 29 with accessible connection points. The scope includes the installation of approximately 3,000 linear feet of 24-inch PVC parallel transmission main from the intersection of N Bellevue Avenue and NW Vivion Road to the intersection of NW 51st Street and Old Pike Road as shown on exhibit G. As the construction will cross Missouri Department of Transportation (MoDOT) rights of way, collaboration with MoDOT will be necessary, including utility boring beneath I-29 and Vivion Road (US Highway 69). Equipment access for drilling across the eastbound and westbound lanes of I-29 will require temporary single-lane traffic control measures. McClure Engineering will coordinate geotechnical engineering services to support this work and is included as part of the Preliminary Design. The new transmission main will run parallel to the existing pipeline through Oaks Homes Association greenspace, which involves securing easements from Oaks Homes and Van Chevrolet Cadillac. In addition to planning, design, and bidding phase engineering services, the project will include coordination with MoDOT to obtain the necessary permits and approvals.

Construction phase services, including construction contract administration, resident project representative and construction survey staking services have been marked NOT included in the Section 3 detailed scope of work. Scope and Fees for these services will be negotiated at a later date via contract amendment.
